Education

Indian Institute of Technology,Guwahati

btech in Bisciencces and Bioengineering

Skills

- HTTML5
- CSS
- Tailwind CSS
- Javascript
- Mongoose
- Node .js
- MongoDb
- Gsap
- React
- Socket.io
- Git Github
- C++
- Complete DSA

About Me

Experienced Web Developer adapt in all stages of advanced web development. Bringing forth expertise in Frontend as well as Backend (MERN)
- Member of SWC-IITG web dev club.
- Member of E-cell

Professional Experience

Portfolio Builder | Frontend developer

What I Do-

1. Server Connection and API Development: Establishes and maintains communication between front end and back end via RESTful APIs, ensuring smooth data transfer for web applications.
2. Frontend Development with React.js: Designs and implements user interfaces using React.js, translating design mockups into responsive web components for optimal user experience.
3. MongoDB Database Management: Manages MongoDB databases, focusing on schema design, indexing, and query optimization to ensure data integrity, scalability, and performance.
4. Redux State Management: Implements Redux for centralized state management in React.js applications, designing stores, reducers, and actions to streamline data flow and updates across components.
5. Design Collaboration and UI/UX Enhancement: Collaborates with designers and developers to create visually appealing interfaces, utilizing design principles and prototyping tools to enhance overall user experience and interface usability.
